Projectile Motion Feedback Survey

What version of Windows do you have installed? *

- ☒ Windows 10
- ☐ Windows 8/8.1
- ☐ Windows 7
- ☐ Windows Vista
- ☐ Windows XP

Did the program crash? *

- ☐ Yes (Please write down what occurred below)
- ☐ No

If the program crashed, please write down what occurred here.

1. Invalid procedure call or argument '5' (E+ for effort) 2. Type Mismatch '13' (0 times 0 plus me) 3. Overflow '6' (Over...no.) 4. Type mismatch (again) '13' (Game, set, no match) 5. Can't open clipboard '521' (Clippy can help!)

Do you have Office 2010 or higher installed? *

☒ Yes

☐ No

Was the program easy to use? *

☐ Yes

☒ No

If the program was not easy to use, why?

2. You should allow the user to enter all the values at once. You should also fix the resolution of the program (scaling) since it cuts off some of the controls. Ergonomically, you should indicate when controls are disabled (especially the entry textboxes). You should be careful with label controls since they are getting cut off (auto resize perhaps?). You should include the help in the program or at least make the link clickable. The time taken to load the graph is quite slow.

.....

Did any errors appear when using the program? *

☒ Yes

☐ No

Did you understand these errors, or should they be better explained? *

Please enter a positive number. (It was understandable)

Did you think the program looks good? *

☐ Yes

☒ No

If you have tried a version with the help button, did you think the help button was useful?

☐ Yes

☒ No (VB6 cannot open links by the way.)

Any features you recommend should be added? *

A internal help feature would be nice. Something to calculate all the values (e.g. height) at x time.

Did you find any bugs? If not, write "No" in the box below. *

Yes, see crashes also graphical glitches with scaling, labels being cut off
